

# HGR-2488 *Prism* VGA Monitor Adapter for the Tascam 2488™ MK1, MKII and NEO

## HGR-2488 *Prism*

Add a full size VGA monitor to your TASCAM 2488 with this simple to install interface which is fully compatible with the MKI (original), MKII and NEO

### Features

- Full colour display on a VGA PC compatible monitor
- XILINX FPGA video processor
- TASCAM 2488 LCD remains fully functional whether or not the PC monitor is connected
- No PC required

### Installation

- Simple installation
- No soldering required
- 15-20 minutes install time

### Additional equipment required

- TASCAM 2488 MK1, MKII or NEO
- VGA 800 x 600 compatible PC monitor (analog interface)
- Male-Male VGA cable

The TASCAM 2488 is a fantastic multi-tracker, but trying to view its small display when you are not directly in front of it or when you have an instrument hung round your neck can be a real problem.

The HGR-2488 Monitor Interface provides the solution. This circuit board fits inside the TASCAM-2488 and reproduces the TASCAM's LCD display on a standard PC monitor.

The large screen format provided by the HGR-2488 allows the musician the freedom to create music away from the 2488, meaning you (and the rest of the band) can easily see what's happening. For TASCAM 2488 MK1 users the low brightness of the LCD display is no longer a major drawback. No more eye strain!

The HGR-2488 has been designed to be as simple as possible for the user to install inside the TASCAM 2488 without the need for soldering, special tools or modifications to the TASCAM 2488 casing. It is essentially 'plug and play'.

To order the HGR2488 VGA monitor adaptor visit the HGR2488 website, where you will find installation instructions, product videos and more information.
